Unit 8
Native Americans
Activity Book
GRADE 5
Core Knowledge Language Arts®
This Activity Book contains activity pages that accompany the lessons from the Unit 8 Teacher Guide. The activity pages are organized and numbered according to the lesson number and the order in which they are used within the lesson. For example, if there are two activity pages for Lesson 4, the first will be numbered 4.1 and the second 4.2. The Activity Book is a student component, which means each student should have an Activity Book.
Native Americans by Region

Write the name of the region in which each Native American tribe, or group, lived.

A. ____________________________________________

The landscape of this region could be harsh with few resources. Some tribes here never really settled. The culture of these tribes grew out of their nomadic lifestyle. They followed the enormous herds of buffalo that moved with the seasons. The buffalo provided them with everything they needed, including food, clothes, and the tepees they lived in. It is believed that, at one time, more than 30 million buffalo roamed parts of North America. Some of the tribes living in this enormous area of grassland did not have an abundance of trees to use for building. Instead, some homes were made out of soil, grass, and roots, whereas others were made out of animal hides and were called tepees.

B. ____________________________________________

The Ancestral Pueblo lived in this region with dry valleys near smaller rivers or waterways. Some lived on raised plateaus and mesas. The trees that grew on these high, flat lands provided both shelter and wood. Whether they lived on the mesas or in the valleys, they learned how to farm with a small water supply. This tribe built tall homes with clay bricks and stone. Eventually they learned how to build solid homes that were several stories high. It would have been an amazing sight to see these stone structures blend in so well with the environment! These native people became known for their stonework, their basket weaving, and their pottery. They carefully wove baskets, coated them with mud, and then baked them in the sun. These baskets could then be used for cooking, carrying water, and storing harvested crops. They planted cotton and used it to make lighter, more comfortable clothing to stay cool in the hot sun.
C. In this region, the Iroquois made the forests their home and utilized the abundant natural resources available to them. Freshwater rivers and lakes and imposing mountains and forests colored the landscape. The landscape and seasons helped shape the Iroquois culture. Where trees were abundant, the Iroquois built longhouses out of wood and bark that provided warm shelters during the cold and snowy winter months. In the spring, the Iroquois cleared the land of trees and shrubs and planted corn, beans, and squash. Frequent rain helped the crops grow. In the wintertime, when food was scarce, many Iroquois left their villages to hunt deer and rabbits in the forests. Tribes often lived near water. It was a source of life, and it provided a means of transportation. They traveled these waters in dugout canoes and fished using nets and traps.

D. In this region, trees grow as tall as mountains and everything tribes needed to survive was readily available in the forests and waters. Cedar trees grew in abundance in this region. The tribes would build plank houses using long, flat planks, or boards, from these trees. The tribes had a hunter-gatherer lifestyle, but they did not need to move around in order to find food. They did not need to farm, either. A very important food source for most tribes was salmon. Some tribes fished using baskets, nets, spears or harpoons, and a variety of ingenious traps to catch salmon. Salmon are only available a few months each year, so the rest of the year people needed other sources of food. To supplement their diet, men hunted the big mammals that roamed the rainforests. Women gathered roots, berries, and grains, including wild rice. Many tribes also hunted other types of fish, as well as whales and seals.

Chapter 1
A Long and Winding Road

Imagine you were born three hundred years ago on America’s Great Plains. Back then, there were no big cities or highways. The landscape reveals only wide-open prairies with rolling hills, lazy rivers, and endless grassland.

Imagine the prairie is your home. Perhaps you are a young Sioux. This is where you were born, and you already know that you will live here all your life. Everything you need to survive is here, amid the grasses and low, rolling hills. Food, shelter, clothing, water, fire, friends, family, and sacred places—everything is here for you.

However, even if the prairie contains everything you need to survive, where on the grassy plains do you find food? What do you use to build a house or make a fire? Where do you find water? How can you survive the frigid, icy winters and the scorching summers?
The answers to these questions are easy to find, as long as you are willing to learn from those who came before you. The people, your people, have been here for some 10,000 years or more. The wisdom and stories of hundreds of generations is your birthright—the most precious thing you will ever own.

The elders tell you stories. They teach you about your place in the world, and they provide the wisdom that is passed down from one generation to another. Your ancestors were the first to walk this land, and they learned to survive here with only their brains, muscles, and courage to sustain them. They were the first to hear the winds and see the waving grass. They found the rivers. You believe their spirits are in the hills and grassy plains, and in the soil beneath your feet.

Most importantly, your ancestors learned to track and hunt the buffalo. The buffalo provide food, shelter, clothing, fuel for fires, and tools. Out here on the Great Plains, your tribe and all the tribes of the Great Plains depend on the buffalo for survival.
The tribes of the Great Plains are certainly not alone in the Americas. There are others, and if you walk far enough in any direction, you will find them. North, south, east, or west, there are different tribes in every habitable place. Over thousands of years, they have learned to survive.
In the southwest, you will meet the Navajo, Pueblo, and all the other tribes of the canyons and deserts. Head southeast and you will find the Cherokee, Creek, and Seminole thriving in the humid woods and swamplands. In the dense, chilly forests to the northeast, there are the Huron and the Six Nations of the great Iroquois Confederacy. To the west, on the dry, flat plateau between the snowy peaks of the Teton and Cascade Mountains, you will meet Shoshone and Nez Perce. Farther west, where trees grow as tall as mountains, you may meet the Chinook, the Pomo, and all the other tribes nestled along the western coast.

Some of the people you meet will be your friends. You will share stories and you will trade with them. Some of them will be your enemies, just as they were enemies to your grandparents and great-grandparents, and they will want to fight. This is the way it has always been, and so you will need to be prepared if you travel from your homeland.

If you are like most Native Americans living on the Great Plains, you will find that you are quite happy to stay and live with your family and friends, the members of your tribe. You do not need to wander too far from home. You will live here on the plains forever, tracking and hunting the buffalo, raising children of your own and teaching them how to live according to the ways of your ancestors. Life is just fine here on the plains. You have everything you need, and little changes, until it does…

Native American Outside Tepee

This image shows a Native American on the Great Plains outside his family’s tepee. The dusty landscape of the Great Plains can be seen in the background. The tepee in this image is made of many buffalo hides sewn together and supported by poles made of pine. In the foreground, the young Native American is preparing hides to be used or traded. The skin on the stick frame is being dried in the sun, and may be used to make clothing, a tepee cover, bedding, moccasins, or for another purpose.
Sample Persuasive Essay

Nature and its resources were very important to Great Plains tribes. Native Americans who lived in the Great Plains were dependent on things from nature to survive and thrive. I think this image best shows the relationship between Native Americans and the land because it shows how important the Great Plains habitat was in shaping the tribes’ way of life.

This image shows a young man working in front of his family’s tepee. His clothing and moccasins are made from the hides of buffalo. The tepee sits on the dusty ground of the Great Plains. Tall, wooden sticks support the tepee cover, and you can see them through the opening at the top of the tepee. A hide is being dried in the sun using a support made of sticks and thread.

In this image you can see the dry, dusty landscape of the Great Plains. It could sometimes be hard for tribes of the Great Plains to find food because of the harsh habitat. The characteristics of this land greatly influenced the way of life for Native Americans in the Great Plains. Over time, the tribes of the Great Plains had to adapt to the environment.

Buffalo were the largest animals in the Great Plains, and the tribes depended on the buffalo in almost every way. One way they used buffalo was to make the covers for tepees, like the one in this image. Tepees were an important part of the way of life of Native Americans who lived on the plains. Tepees were made from resources they could find in nature. They used wood to make sturdy poles for the tepee. They used buffalo hide to make durable covers to stretch over the poles, and they used sinew from the buffalo to sew the covers together. The tepee in this image shows how important the animals and plants were to Native Americans of the Great Plains.
Not only did Native Americans use buffalo hides to create tepee covers, but they also used the hides for their clothing. In this image, the clothing and moccasins the man is wearing were made from a buffalo's hide. Native Americans used the whole buffalo to survive and thrive; everything had a purpose.

The buffalo, an important part of the Great Plains landscape, was important to the Great Plains Native Americans’ way of life. The harsh landscape made it difficult to survive in the Great Plains. By using an important part of nature, the buffalo, Native Americans of the Great Plains adapted to the environment and were able to thrive. I chose this image because it shows how important buffalo and the natural habitat of the Great Plains were to the Native American way of life.

Chapter 3
Tales from the Great Plains

The image of a brave warrior on horseback gazing over his beloved prairie or canyon is perhaps one of the things that comes to mind when we think of Native Americans. Horses were, and remain, essential to many Native American cultures. But there was a time, long ago, when Native Americans did not know about horses.

When Native Americans first saw the Spanish conquistadors on their horses, they wondered if man and horse were one beast, for they had never seen a human riding any kind of animal. The Comanche soon realized this was not true, but many years would pass before they learned to talk to the horses and ride them like the Spaniards.

There was once a great horse that all the Comanche feared. This horse ran wild on the prairies, and none of the Comanche would go near him, for he was fierce and powerful. They let him roam and never tried to catch him. The horse was easy to identify because he always wore a saddle and the remnants of a blue, silk blanket on his back. This is a story of how the horse with the blue blanket came to roam free on the prairie.
The Swift Blue One (Comanche)

One day, a brave young Comanche warrior was out hunting when he saw a Spanish soldier riding on a horse. The soldier wore heavy metal armor, and he carried a gun and a long, sharp sword. Perhaps this soldier was lost, or perhaps he was a scout sent to discover what was over the next hill. The young Comanche warrior and his people considered the Spanish to be enemies, for the Spanish, with their guns, sharp steel swords, and powerful horses, sometimes attacked the Comanche camps.

Fear and anger rushed through the Comanche’s veins, and he rose from his hiding place in the tall grass and shot an arrow at the Spaniard. The arrow found its way through a crack in the soldier’s armor, and he fell from his horse to the ground with a loud thud. Wounded, he moaned in pain. His horse stood over him and did not move.
The Comanche wanted to approach the Spaniard to inspect his strange weapons and armor, but when he drew near, the horse snorted angrily and beat his front hooves on the ground. The Comanche was afraid of the horse and he backed away. He wanted the horse to leave, so he snarled and growled and yelled at him, but the horse still did not budge. The Comanche did not speak the horse language, and he did not know what to do next.

The Spaniard could see that the Comanche wanted to talk to the horse. Using sign language, the Spaniard told the Comanche that he would teach him the horse language if the Comanche would spare his life. The Comanche agreed. The Spaniard taught the Comanche the words people use to make the horse go and stop, walk and gallop. The Comanche repeated the words again and again until he knew them and could say them to the horse.

The Comanche tried to save the Spaniard’s life, but the arrow was too deep, and he died anyway. The horse had a soft blue blanket and a saddle on its back. The Comanche did not remove either because he thought the horse wanted them. Then the Comanche got onto the horse’s back and spoke the horse language, and the horse carried him back to camp.
The other Comanche were amazed when they saw him. He told them his story and showed them how he had learned to make the horse go and stop, walk and gallop. After that, the Comanche warrior always rode the horse, and he became a fearsome warrior and a great hunter. He named the horse The Swift Blue One because he was as fast as the wind. The other warriors were afraid of the horse, and they thought he would ride over them and crush them with his big hooves.

One day, the warrior was killed in battle, but The Swift Blue One survived. The other Comanche were still afraid of the horse, so they set him free to roam on the prairie. They would see him out there sometimes, running as fast as the wind, with a saddle and blue blanket on his back.

In time, more horses escaped from the Spanish soldiers, and these horses joined The Swift Blue One out on the prairie. He became their chief, and they followed him everywhere. The Swift Blue One’s herd grew and grew, until there were too many horses to count. Eventually, other Comanche learned the horse language, and the horse culture spread. Many of the horses ridden by the Sioux, Apache, Pawnee, and other tribes of the Great Plains and beyond are the descendants of The Swift Blue One.
Write a paragraph summarizing this excerpt, using the core vocabulary words remnant and scout. Remember, scout can be used both as a noun and as a verb.

This image shows a young man working in front of his family’s tepee. His clothing and moccasins are made from the hides of buffalo. The tepee sits on the dusty ground of the Great Plains. Tall, wooden sticks support the tepee cover, and you can see them through the opening at the top of the tepee. A hide is being dried in the sun using a support made of sticks and thread.

In this image you can see the dry, dusty landscape of the Great Plains. It could sometimes be hard for tribes of the Great Plains to find food because of the harsh habitat. The characteristics of this land greatly influenced the way of life for Native Americans in the Great Plains. Over time, the tribes of the Great Plains had to adapt to the environment.

Buffalo were the largest animals in the Great Plains, and the tribes depended on the buffalo in almost every way. One way they used buffalo was to make the covers for tepees, like the one in this image. Tepees were an important part of the way of life of Native Americans who lived on the plains. Tepees were made from resources they could find in nature. They used wood to make sturdy poles for the tepee. They used buffalo hide to make durable covers to stretch over the poles, and they used sinew from the buffalo to sew the covers together. The tepee in this image shows how important the animals and plants were to Native Americans of the Great Plains.

Not only did Native Americans use buffalo hides to create tepee covers, but they also used the hides for their clothing. In this image, the clothing and moccasins the man is
wearing were made from a buffalo’s hide. Native Americans used the whole buffalo to survive and thrive; everything had a purpose.

The buffalo, an important part of the Great Plains landscape, was important to the Great Plains Native Americans’ way of life. The harsh landscape made it difficult to survive in the Great Plains. By using an important part of nature, the buffalo, Native Americans of the Great Plains adapted to the environment and were able to thrive. I chose this image because it shows how important buffalo and the natural habitat of the Great Plains were to the Native American way of life.

Wrap Up Question: Compare and contrast the way Spanish settlers interacted with Native Americans in what is now California with the way other European settlers interacted with Native Americans in other regions of the country.
Excerpt from “The Changing Landscape of California”

Read the following excerpt and complete the activity that follows.

It is impossible to know exact numbers, but best estimates are that there were around 300,000 Native Americans in California when the first Spanish settlers arrived. There were well over 100 different tribes and a wide variety of cultures, languages, and customs. Mostly, they lived in small villages ranging from a hundred to a thousand people. There were no formal borders or property lines, but each tribe was adapted to life in a specific area.

All the California tribes lived a hunter-gatherer lifestyle. Acorns were a major source of food throughout the region. Acorns are nuts from the oak tree. You would not want to eat an acorn raw because the taste is very bitter. But if you grind it up into flour and soak it, you can remove most of the bitterness and use it to make tasty bread. Fish were another major food source for many tribes. The tribes caught fish from the ocean, the rivers, and the lakes. Besides acorns and fish, each region had various animals and plants for people to hunt and gather, such as rabbits and deer, plus various roots, berries, and other gifts from nature.
Trade was also an important part of tribal life in California. If they could not find what they needed in nature, the people could trade with a neighboring tribe. Coastal tribes had access to lots of fish, but they needed more acorns. Inland tribes had plenty of acorns but not always enough meat. Tribes in the central mountains had access to a special rock called obsidian, or volcanic glass, which was valuable for making razor-sharp arrowheads and knives. Obsidian was far more valuable to Native Americans than gold or silver. They did not find too much use for those metals, though they did know where to find them.

Canoes played an essential role in the culture and lifestyle of nearly every California tribe. Different regions made different kinds of canoes. In southern California, they built big *tomols* out of wooden planks. Only specially trained craftsmen could build them, and they never shared their secrets! *Tomols* could carry several paddlers and hundreds of pounds of trade goods. Best of all, the sturdy, speedy *tomols* were seaworthy, so southern tribes could paddle up the coast and trade with northern tribes.

*Tomols* carried several paddlers.
In the Central Valley, the people made their canoes by weaving long, tough reeds, or river grass. There they did not need to paddle into the rough ocean. Instead, they had wide, lazy rivers and sparkling lakes. And all the way up north, where the great redwood trees grow up into the clouds, people made dugout canoes from hollowed-out logs. Dugout canoes were tough enough for the ocean but also nimble enough to survive the wild mountain rivers.

Daily life focused on securing enough food for everyone. Fortunately, California was a land of plenty, so if everyone worked hard there was usually enough food to go around. In good years, there was more than enough food, so the people had time for other things. Basket-weaving was common throughout California. Tribes of the Central Valley were highly skilled, producing a variety of colorful baskets in all shapes and sizes.

There was also time for fun and games. In northern California, children enjoyed a game similar to soccer. The boys and girls all played together. Boys were only allowed to kick the ball, whereas the girls could kick it, throw it, or carry it into the goal. However, a boy was also allowed to pick up a girl and carry her into the goal with the ball!
As with all Native Americans, the people of California built their houses using the best materials available in their home territory. Southern tribes used small trees and reeds to build tules. A tule was a round, one-room hut. Despite being made from reeds, tules were strong, able to withstand wind and rain, and cozy enough for mild, southern California winters. The Miwok people and other tribes of central and northern California preferred the umacha, which was shaped like a tepee but made of long wooden rails instead of buffalo hide. Farther north, in the redwood forests, the Wiyot people and their northern neighbors built stout, sturdy houses out of redwood planks.

Roundhouses were the central feature in most villages. No matter what type of houses they built, and no matter whether the tribe was large or small, wealthy or poor, there was almost always a roundhouse in the middle of the village. The roundhouse was used for ceremonies and important meetings. The roundhouse was also where the tribal religious leaders, or shamans, carried out important rituals.

Religious beliefs reflected a close connection to the cycles of nature and to animals. While all tribes had unique beliefs, myths, and rituals, the people generally believed they shared a special kinship or bond with other living things. They felt fortunate and thankful to live in a place with so many resources.
Describe what life was like for Native Americans living in what is now known as California before European settlers arrived in the area.
Proofreading for Shifts in Verb Tense

In each of the writing samples, find and correct three inappropriate shifts in verb tense.

Sample #1

Home Sweet Home

Most tribes from the Plains and neighboring regions were seminomadic. This means they did not live in one place all year long. For example, Plains tribes usually followed the buffalo, and they also go to special camps during the frigid winters. At that time tepees are built using only buffalo hides and wooden poles, but they could stand up to thunderstorms and blizzards. Tribes of the Great Basin build domed houses called wigwams, which were cozy and safe in all kinds of weather.

Pomo Woman Outside Her Tule

This image shows a Pomo woman sitting outside her tule cooking. The Pomo lived in present-day Southern and Central California, in marshy locations. A marsh can be seen in the background. The Pomo built homes, called tules, from the tule reeds and other materials found in the marsh. They also used tule reeds to weave baskets, like the one next to the tule behind her. They used these baskets to store food such as acorns. The woman in the image is using hot stones to cook acorn soup, made from ground acorn meal and water. While women gathered acorns and berries, men went out to fish and hunt for small game, such as rabbits and squirrels.
This image shows Chumash men paddling in a tomol. The Chumash lived, and still live, on the southern coast of present-day California and have a very special relationship with the sea. To travel by ocean and river, the Chumash built large canoes called tomols. They built them out of the trunks of redwood trees that floated down the coast from Northern California. To glue the planks of wood together, they made a sticky substance called yop from tar taken from beaches and pine sap taken from local pine trees. Craftsmen used sharkskin to sand the tomols and make them smooth. Because the tomols were large, many men had to paddle them. The tomols were large enough to carry food and supplies to be traded with neighboring tribes.
Wiyot World Renewal Ceremony

This image shows Wiyot people dancing in a World Renewal Ceremony at Tuluwat. Tuluwat is located on an island off California’s coast and is the center of the Wiyot world. Historically, tribe members made masks out of wood depicting animals of the region. They danced and held ceremonies on the same ground for hundreds of years. As a result, each year when they returned for the World Renewal Ceremony, they danced on the broken shells of shellfish they had eaten in years past. The dancers wore skirts made of grass and necklaces of shells from the ocean and beads made from pine nuts and other seeds. The World Renewal Ceremony still happens there today.

Chronological Narrative for “The Swift Blue One”

Fill in the blanks with the best transitional words or phrases that help make this story flow.

The other Comanche were amazed when they saw him. He told them his story and showed them how he had learned to make the horse go and stop, walk and gallop. (After that/Before that) ________________, the Comanche warrior always rode the horse, and he became a fearsome warrior and a great hunter. He named the horse The Swift Blue One because he was as fast as the wind. The other warriors were afraid of the horse, and they thought he would ride over them and crush them with his big hooves.

(Previously/One day) ________________, the warrior was killed in battle, but The Swift Blue One survived. The other Comanche were still afraid of the horse, so they set him free to roam on the prairie. They would see him out there sometimes, running as fast as the wind, always with the same blue cover on his back.

(Right now/In time) ________________, more horses escaped from the Spanish soldiers, and these horses joined The Swift Blue One out on the prairie. He became their chief, and they followed him everywhere. The Swift Blue One’s tribe grew and grew, (until/next) ________________ there were too many horses to count. (Eventually/Meanwhile) ________________, other Comanche learned the horse language, and the horse culture spread. Many of those same horses ridden by great warriors of the Sioux, Apache, Pawnee, and all the tribes of the Great Plains and beyond are grandchildren of The Swift Blue One.

Excerpt from “Myths from the Pacific Northwest”

Read the following excerpt and complete the activity that follows.

Thunderbird and Killer Whale

Thunderbird is a mythical creature common in most Pacific Northwest cultures. It is also a common theme on totem poles or ceremonial costumes. In most stories, Thunderbird was a kind and powerful creature who often helped people. The story of Thunderbird and Killer Whale appears in many tribal mythologies. Like many myths, this one was used to explain certain aspects of nature or important events. There are two natural events, or phenomena, explained in this story. Can you tell what they are?

One day Killer Whale arrived in the waters and attacked all the other fish. Killer Whale was hungry, and he ate many fish. The fish he did not eat were so scared they swam away to other waters. Then, the people could not find any fish for themselves and they began to starve.

Thunderbird was a big, mighty bird. His bright, colorful feathers were as long as canoe paddles, and his talons were like harpoons. When he flapped his great wings, the sound of thunder rumbled through the skies.

One day, Thunderbird was flying along the coast. He looked down and saw that the people were starving. This made Thunderbird sad, because he loved the people and did not want to see them suffer. He asked them why they did not have any fish, and the people told him about Killer Whale. This made Thunderbird very angry.

Thunderbird found Killer Whale and swooped down out of the sky. Thunderbird grabbed Killer Whale with his talons and tried to carry him away, but Killer Whale put up a fight. He wrestled free from Thunderbird’s grasp and fell down into the ocean with a great splash. The splash was so big that it shook all the waters and even the land. The waters rose up and covered the land. Trees were ripped from the soil, houses were shattered, and many people died before the ocean waters receded.

Thunderbird and Killer Whale fought for many days. At last, Killer Whale knew he could not win, and he swam away. Gradually, the fish returned and the people had food again. Ever since, the people have never forgotten how Thunderbird helped them.
According to the story, Thunderbird’s wings cause the sound of the thunder. This is common in most Thunderbird myths. But this story seems to explain something else. Many researchers believe this story is about a tsunami, or tidal wave, that struck the Pacific Northwest hundreds of years ago. Tsunamis are caused by earthquakes in the earth’s crust, deep beneath the ocean surface. The vibrations from the earthquake create waves, and if the earthquake is strong enough, these waves can form a tsunami. Tsunamis are very destructive when they strike land. It is no surprise that the survivors would mark the event with a myth like this.
Write a paragraph summarizing this excerpt, using the core vocabulary words recede and vibration.

Excerpt from “Severing Ties”

Read the excerpt and complete the activity that follows.

Native Americans were well adapted to the cycles and patterns of nature. Whether they lived in a small fishing village or a large, sprawling farming society, they learned to survive in harmony with their surroundings. They used wood from trees, but they did not cut down all the trees. They used every part of the buffalo, but they did not kill all the buffalo. They made jewelry using stone or shell beads and sometimes copper, but they did not destroy the mountains and rivers to get all these materials. They gathered nuts and berries, but not too many, and they always left enough new seeds to sprout for future generations.

The basic rules and patterns of nature never really change. The cycles remain the same. And yet, change is in everything. Change comes with every season, just as it comes in various stages of our lives. These are the changes we understand and know to expect. But sometimes there are other types of changes. Nobody can predict exactly what the future will bring. Native Americans understood this fact long before they encountered Europeans.
Through their myths and spiritual ceremonies, Native Americans gave thanks and praise to nature’s helping spirits—the plants, animals, waters, and sunshine. But they also asked the spirits for safety and mercy. They asked to be spared from famine, drought, and war. Most years, the people were happy, well-fed, and at peace with their neighbors. But they knew there would also be lean years when the buffalo herds were too thin, or too little rain fell on the corn and bean crops. They knew there would be wars and conflicts with other tribes as well.

Some tribes controlled better land with more food and resources than other tribes. Some tribes grew to be large and dominant, while others simply survived from season to season. Some tribes faced more trials and tribulations than others. Sometimes, one tribe would force another tribe off its land, so, for example, an Eastern Woodland tribe might have to adapt to life on the plains, or a Plateau tribe might have to learn to survive in the desert. Sometimes the victors of war would take the losers captive, or adopt them into their tribe. Other times, mighty tribes fell and weaker ones rose up.

And so everything changed, and yet in many ways everything stayed the same. In spite of all of life’s challenges, Native Americans upheld their way of life for thousands of years. Wherever they were, they strived to live in harmony with their surroundings. They lived according to the same patterns and cycles as everything else in nature. When the acorns ripened and fell, then it was time to gather and eat acorns. When the buffalo moved, it was time to move the village. And when the spring rains fell, it was time to plant new seeds. Year after year and generation after generation, according to these cycles, Native American tribes created their own history.
Europeans who migrated to the Americas did not share the same traditions and beliefs as Native Americans. Aside from their culture, religion, and technology, Europeans had different beliefs regarding land ownership and individual rights and liberties. To understand just how very different they were, it is important to reflect on what life was like in Europe.

In the late 1400s, Europe was just emerging from the feudal system of the Middle Ages. Most people were still tied to farming the land, the bulk of which was owned by rich, influential members of the nobility. There was no “free” land to explore and settle on. There was little social mobility. For three hundred years after Columbus’s first journey, the exploration and colonization of the “New World” brought incredible new wealth to European nations. However, a large part of that wealth went straight to the same royals and aristocrats who already owned all the land and resources in the “Old World.”
Then came the founding of the United States in 1776. This new nation put in place systems of laws designed to protect the right to “life, liberty, and the pursuit of happiness.” Now, the New World offered new hope and opportunity for even the most lowly members of European society. The New World offered land, ready to be farmed, to all, including those who would never have had such an opportunity in their own countries.

However, it wasn’t quite that simple. By the late 1700s, land in the East had been claimed, and there was stiff competition for jobs. Therefore, many new immigrants looked beyond the East to the frontier—the untamed wilderness—for opportunities.
Years later, a great Lakota chief named Red Cloud said this: "They made us many promises, more than I can remember, but they never kept but one: they promised to take our land, and they took it." This quote neatly summarizes what happened to Native Americans when the United States expanded across the West. Tribes had a connection to the land that non-Native Americans could not understand. Without land, it was extremely difficult for tribes to maintain their culture and identity.

_______________ the Lenape people worked in the fields, the creatures of the land and sky set to work, too. Some animals woke up from their winter sleep. Others dug burrows, and birds built nests in preparation for their young. The Lenape and the animals and birds worked side by side.

_______________ spring was turning into summer, the heat from the sun grew stronger. ________________ this time, the Lenape people fished for salmon, herring, and shad. They guarded their ripening crops from the greedy birds. Lenape children gathered berries, collected firewood and played in the sparkling rivers. As they played, they searched for turtles basking in the sunshine.
The autumn, the Lenape harvested their gourds and pumpkins. They gathered nuts, roots, and berries—such as huckleberries, raspberries, and strawberries. The cold weather arrived, they made beautiful baskets in which to store their winter food.

Excerpt from “Your Name Is Luther”

Read the following excerpt, beginning at the bottom of page 70 with the section titled “Luther’s Story,” and complete the activity that follows.

to strip away everything that made them Native Americans. His goal was “assimilation through education.” As he saw it, Native American culture was the main problem, and the solution to the problem was to replace that culture with something new. To do that, he believed Native Americans needed to change their language, their religious beliefs, all of their habits and customs, and even their clothing and hairstyles. Today, it is no surprise that many people blame Pratt for trying to destroy what was left of Native American culture. In many ways, that is exactly what he wanted to do.

Pratt gathered support for his idea, and eventually he convinced Congress to give him some money to open an experimental school. The U.S. Army agreed to let him use an old barracks in Carlisle, Pennsylvania. Pratt converted the buildings there into the Carlisle Indian Industrial School. At this school, Native Americans would learn to speak, read, and write in English. They would also learn about U.S. history and customs, such as Thanksgiving and the Fourth of July. They would no longer be allowed to dress like Native Americans and were instead made to wear uniforms. They would not be allowed to sing, dance, or tell their old stories, either. They would be taught to cast aside their ancient ways and learn a new way to live in America.

To find students for his new school, Pratt went back to the same reservation lands where he once fought as a soldier, in South Dakota and Nebraska. He talked to some of the tribal leaders. He told them he had an idea to help their children find a bright, happy future. This brings us to the story of another colorful, fascinating character in American history: Luther Standing Bear.

Luther’s Story

When Luther was born, he was named Plenty Kill, because his parents thought he had the heart of a hunter and warrior. He was born in the Black Hills of South Dakota in 1868. Back then, many Lakota and other Sioux tribes were still at war with the U.S. Army. Plenty Kill lived on a reservation,
but he was raised according to the old, traditional ways. He learned to hunt buffalo and ride a horse. He also learned to fight. Plenty Kill’s father was a great warrior. He called the U.S. soldiers “Long Knives,” because of the swords carried by cavalry officers like Richard Henry Pratt.

When Plenty Kill was a boy, his father made a bow and arrows for him. The bow and all the arrows were painted red as a sign that his father had been wounded in battle. Plenty Kill grew up expecting that he, too, would someday fight and possibly die in battle against the Long Knives. However, his father did not really want his son to become a warrior. Like many other Lakota, he was tired of fighting. Instead, he wanted something different for his son.

Then, one day, Richard Henry Pratt came to talk to them about the Carlisle School. Pratt took Plenty Kill’s father and other tribal elders to visit the new school. On the trip, they also went to New York City and Washington, D.C. They met the president of the United States, the “Grandfather of the Long Knives.” When Plenty Kill’s father returned from his trip, he said this:

“My son, since I have seen all those cities, and the way the Long Knife people are doing, I begin to realize that our lands and our [animals] are all gone. There is nothing but the Long Knives everywhere I went,
and they keep coming like flies. So we will have to learn their ways, in order that we may be able to live with them. You will have to learn all you can, and I will see that your brothers and sisters follow in the path that you are making for them. Someday I want to hear you speak like these Long Knife people, and work like them.”

So, Plenty Kill went to Carlisle, Pennsylvania, along with 146 other Native American children, mostly from Great Plains tribes. There, he chose his new first name—Luther—at random from a list of names on the chalkboard. He could not yet read, but the teacher ordered him to choose a name anyway, and Luther was the one he chose.

Life at the Carlisle School was totally different than anything Plenty Kill, now Luther, had ever known, and it certainly was not much fun. The teachers forced all the boys to cut their hair, which is something Lakota men never did. The boys were very angry about it and did not understand, but they had no choice. Discipline at the school was strict and punishments were severe. If the boys refused, they were punished, and then they had to get a haircut anyway.

After their haircuts, the children received new clothing. They had never worn such tight, scratchy garments and they were very uncomfortable. Aside from the sadness of separation from their families, the worst part was that they were not allowed to speak their own language. The children were only allowed to speak English, which was impossible at first since none of them knew that language. Luther was a very fast learner, though, and he grew to enjoy reading and writing.

Luther was a star student at Carlisle and became a recruiter for the school, meaning that he encouraged other Native Americans to send their children there. The people at the U.S. Bureau of Indian Affairs liked what they saw at the Carlisle School. They built about 25 more “Indian boarding schools” around the country, all modeled after the Carlisle School and
funded by the government. They also encouraged church missions and other organizations to create similar schools on reservations.

Unfortunately, few Native American children were as successful as Luther and other members of the first class at the Carlisle School. Most boarding schools were run like military bases, and children were often treated very badly. In some schools, children were treated more like enslaved workers than students. They lived in poor conditions and diseases were widespread. If they tried to run away, they were captured and forced to do physical work as punishment. Pratt himself complained that the schools were hurting rather than helping Native Americans. Eventually, he complained so much that he was fired from the Carlisle School. He continued to promote “assimilation through education,” but he was never very successful, and the schools never improved much. Many were closed by the late 1920s.

Luther went on to live a full and fascinating life. Despite efforts by Pratt and the teachers at the Carlisle School, Luther never forgot his native language and customs. He never cut his hair again, either, and he did not think any other Native Americans should have to. Luther spent the rest of his life working to preserve Lakota heritage. He wrote books and gave speeches, and he even became a movie actor. He tried to make sure Hollywood film directors portrayed Native Americans in a fair, honest way, instead of always presenting them as villains or savages.

Luther believed in the importance of education, and he was always grateful to Pratt for the chance to attend his school. However, Luther did not agree that Native Americans should abandon their culture. He thought Lakota children should learn about Lakota history and that they should be proud of their culture and beliefs. Today, Luther Standing Bear would be happy to see that present-day Native Americans are proud of their heritage and have not abandoned their culture.

Spelling Words

The following is a list of spelling words. These are content words related to the Reader, A Changing Landscape. During Lesson 15, you will be assessed on how to spell these words. Practice spelling the words by doing one or more of the following:

- spell the words out loud
- write sentences using the words
- copy the words onto paper
- write the words in alphabetical order

When you practice spelling and writing the words, remember to pronounce and spell each word one syllable at a time.

1. lifestyle
2. survive
3. ceremony
4. immigrant
5. assimilate
6. heritage
7. generation
8. landscape
9. reservation
10. spiritual
The following chart provides the meanings of the spelling words. You are not expected to know the word meanings for the spelling assessment, but it may be helpful to have them as a reference as you practice spelling the words.

Chapter 9

Battle of the Little Bighorn

In previous chapters you read about conflict between Native Americans and settlers moving west. This is the story of the Battle of the Little Bighorn. It is an event that stands out in the history of this conflict.

Lieutenant Charles Varnum was awake long before reveille that morning. In fact, he had not slept at all the night before, and he was not alone, for there was going to be a battle that day, and everyone knew it. He watched the sunrise and light fog drifting across the wide prairies of southern Montana. This was a pleasant place to be in the summertime, even if you had to wear a heavy wool uniform like Varnum and his fellow cavalrymen.

The troops were camped in a little river valley. The day before, Varnum had noticed silvery rainbow trout in the nearby creek, and perhaps the thought had crossed his mind that it would be nice to spend the day fishing beside that little creek. However, Varnum knew very well that this day would hold no time for leisure or relaxation. They were at war, and the enemy was near. In fact, according to his scouts, the enemy was just on the other side of that river.

The war became known as the Black Hills War, because much of the fighting was in or around the Black Hills of South Dakota. Later, it was also referred to as the Great Sioux War of 1876. Lieutenant Varnum was in the Seventh Cavalry Regiment, commanded by Lieutenant Colonel George Armstrong Custer. This was only one of many “Indian Wars” and other bloody conflicts between Native Americans and U.S. forces.
As Chief of Scouts, Lieutenant Varnum gathered intelligence, or important information, about the enemy’s location and strength. Varnum had a tough, ragtag group of men under his command. The scouts included warriors from the Arikara and Crow tribes. Their people once fought the U.S. soldiers, too, but they had surrendered and moved onto the reservations. Their tracking skills and knowledge of other tribes was very useful.

The day before, June 25, Varnum sent his scouts to explore the banks of the Little Bighorn River. They reported finding a very large Lakota Sioux village. They said there were many warriors in the village, but they did not know how many exactly. They only knew that it was a very big village with hundreds of tepees. As was his duty, Varnum reported this information to Custer, his commander.
Custer wanted to see the village, so Varnum and his scouts took him to the top of the tallest nearby hill. From there, they could see smoke from the campfires, and they could see a few tepees and some horses, but not much else. Custer said he wanted to attack the village, but the Arikara and Crow scouts protested, saying they had never seen such a large village. Nonetheless, Custer saw this as an opportunity to deal a major blow to the enemy and maybe even end the war, so he ordered his men to prepare for an attack.

Years earlier, during the Civil War, Custer had gained a reputation for being fearless and aggressive. However, he also had a reputation for being reckless, taking big risks with the lives of his soldiers. Ten years later, Custer was still the same type of soldier. Like everyone else in the Seventh Cavalry, Varnum had great respect for Custer and was proud to serve under his command. Still, Varnum could not help feeling that maybe, this time, Custer was being too reckless.

Custer could not see the whole village from the top of that hill because it extended several miles along the river valley. He only saw the very edge of the village. Beyond that, there were at least 10,000 Lakota Sioux camped along the river, including as many as 2,000 warriors. And the Lakota were not alone. Their allies, the Arapahoe and Cheyenne, were there, as well. In the past, the tribes had often gathered in this valley of the Little Bighorn River because it was good hunting ground and there was plenty of water nearby. In 1876, with war raging all around, they were all gathered in this place. Amongst the thousands gathered together were a famous Lakota holy man named Sitting Bull, along with a great warrior-chief named Crazy Horse.

Many members of the Lakota had tried to live on the reservations. They had signed treaties with the federal government. The treaties said it was their land and nobody else’s. But settlers moved in anyway, and the reservations
kept getting smaller and smaller. At last, the Lakota left the reservations. They packed up their tepees and traveled across the plains into Wyoming and Montana to hunt buffalo and live free. Of course, the U.S. government wanted them to go back to the reservations. They told the Lakota to return by midnight on January 31, 1876, or there would be war. The Lakota did not return to the reservations, and the Black Hills War started the next day.

Sitting Bull was a famous spiritual leader, known among all the Lakota and their allies. He told his people to have courage in their war against the *Wasichu*. That is what the Lakota called the soldiers and settlers: *Wasichu*. The true meaning of this word is not certain, though some have concluded that it means “person who takes the fat,” or someone who is greedy. Anxious and uncertain of their future, the tribes gathered in this valley in the early summer of 1876, because Sitting Bull was going to perform a Sun Dance. The Sun Dance was an ancient, sacred ritual. During the Sun Dance, Sitting Bull prayed for a vision of the future. He asked the spirits what would happen to his people. Sitting Bull predicted that the Lakota would win a great victory in battle.

Sitting Bull was not the only important leader in the great village on the Little Bighorn that day. Crazy Horse was there, as well. In some ways, Crazy Horse was a little like Custer, bold and reckless. In battle, he rode straight at the enemy, but no arrow or bullet ever found him. All the warriors were happy to follow Crazy Horse wherever he went, because he always found victory.

Excerpt from “The Taking of the Land”

Read the following excerpt aloud to a family member, beginning with the first full paragraph on page 87. You are reading this excerpt for fluency, so you should read through it at least once from beginning to end without stopping.

The Dawes Act

The most important part of the Dawes Act involved the division, or allotment, of land to individual owners. As long as the Dawes Act was in effect, no tribe was allowed to claim ownership of any land. Instead, the land was divided into individual lots and given to individual owners.

Besides the destruction of their cultural identity, Native Americans also lost even more land as a result of the Dawes Act. Many simply sold their land to anyone who was willing to buy it. Others lost their allotments because they went into debt after borrowing money to try to make ends meet. Some allotments were never given to Native Americans at all but simply handed over to homesteaders.
Hopi Petition

In March of 1894, the Hopi people in the Arizona Territory sent a petition to “the Washington Chiefs” in response to the Dawes Act of 1887. They had observed U.S. Agents marking their land and were worried about the effect the Dawes Act would have on their way of life. Thomas Keam, owner of a trading post, transcribed the Hopi petition.

“During the last two years strangers have looked over our land with spy-glasses and made marks upon it, and we know but little of what this means. As we believe you have no wish to disturb our possessions, we want to tell you something about this Hopi land.

None of us were asked that it should be measured into separate lots and given to individuals for this would cause confusion.”

The Hopi’s land was arid and a difficult place to grow crops and, over hundreds of years, they had learned to adapt to the environment.

“...our fields are numerous but small, and several belonging to the same family may be close together, or they may be miles apart, because arable localities are not continuous.”

They shared farmland among families and moved their farms when winds blew the fertile sands across the land.

“The American is our elder brother and in everything he can teach us, except in the method of growing corn in the waterless sandy valleys, and in that we are sure we can teach him.”

They did not want to lose their cooperative way of life or the freedom to move their farms as needed.

“We most earnestly desire to have one continuous boundary ring enclosing all the Hopi lands, and that it shall be large enough to afford sustenance for our increasing flocks and herds.”

The Bureau of Indian Affairs never sent a response to the petition.

Unit Assessment—Native Americans

Reading Comprehension

Today you will read two selections about Native Americans. After reading the first selection, you will answer several questions based on it. Then, you will read the second selection and answer several questions based on it.

The National Museum of the American Indian

1 The National Museum of the American Indian (NMAI) opened in Washington, D.C., in 2004. It is one of the Smithsonian Institution Museums. Other Smithsonian Institution Museums include the Museum of Natural History, the Air and Space Museum, the American Art Museum, and many others. The museum boasts an unmatched collection of indigenous American art and artifacts. It includes objects from many different cultures in North, Central, and South America.

2 There are many fine, smaller museums all over the United States with great collections of Native American artworks and artifacts. The founders of the NMAI did not necessarily think these other museums were bad. But they were bothered by one thing that seemed to be very common. These museums often presented the artifacts as if they came from lost or dead cultures. However, the founders of the NMAI wanted to create a different kind of museum. They were successful. Outside and inside—from the architecture and landscaping to the layout and design of the exhibits—the NMAI is unique. In fact, it is nothing like other museums on the National Mall, or anywhere else for that matter.

3 The founders of the NMAI knew that Native American culture is not dead. Lifestyles and everything else have changed. But the traditions and beliefs live on among the Native American tribes and nations of today. The objects in the collections at the NMAI are not meant to be viewed as mere artifacts or relics gathered by archaeologists and scholars. These are not just old things dug up out of the ground or discovered in ancient burial mounds or abandoned cities. Instead, they are sacred objects from cultures that continue to live and thrive today.
The museum’s founders invited representatives from all tribes to choose the objects and decide how the museum exhibits should be displayed. The tribal representatives chose objects that best reflect their tribes’ traditions and beliefs. They also decided exactly how to explain the meaning and importance of these objects. As a result, visitors to the museum learn about the objects from the Native American perspective, not from the perspective of archaeologists or historians.

Also, many objects in the NMAI continue to play an important role in Native American tribal life. This is unlike objects in most other museums. Although the objects are held in safekeeping by the museum, they actually still belong to the tribes themselves. For instance, some tribes come and “check out” or use certain objects for important religious ceremonies. In that sense, it is more like a library than a museum. In fact, if tribes request them, the museum will return objects to the tribes on a permanent basis. It was not always this way. This represents a very important change from the way these objects were once treated by society.

In the past, many of these objects were bought and sold by various collectors, just like any other art or artifact. They were treated as the property of whoever happened to find them or buy them. However, to many Native Americans, these objects were basically stolen. That does not necessarily mean that those who sold and collected them were bad or evil in some way. But those people were wrong to think that nobody cared about the objects anymore. These objects were not created as products to be bought and sold. Everything the Native American ancestors made was an extension of their close relationship to the natural environment. Everything came from the earth, from their clothing and tools to the objects they used in religious ceremonies. Today, we can see that these objects are quite beautiful and unique. But to Native Americans, these objects are not mere artifacts. They are more like messages passed down from the ancestors. They cannot be owned by individuals. They belong to the tribes, just like the ancient stories, languages, and customs. The difference is these things can be seen and touched. (Visitors can see them, but besides museum staff and trained curators, only tribal members can actually hope to touch them.)

Objects of Native American culture have been highly prized by collectors all over the world because they are so beautiful and unique. This has been true from the time of the earliest European explorers until today. For hundreds of years, as Native Americans were killed and forced from their land, their sacred objects became scattered, like leaves in the wind. Now, many of those objects have finally been returned to their rightful owners. This was not easy. The founders of the NMAI worked very hard to secure the many thousands of pieces now held by the museum.
There was a time when the U.S. government literally tried to exterminate Native American culture, if not Native American people themselves. Today, the majority of funding for the Smithsonian Institute and therefore the NMAI comes from that same government. The museum itself is therefore a symbol of how much has changed in the way Native American culture is valued and respected by the rest of American society.

Questions

1. What one thing bothered the founders of the National Museum of the American Indian (NMAI) that was common among other museums with Native American collections?
   A. These museums often asked tribes to create artifacts they use today.
   B. These museums often allowed visitors to see and touch the artifacts on display.
   C. These museums often presented the artifacts as if they came from lost or dead cultures.
   D. These museums often did not pay enough money to purchase Native American artifacts.

The following question has two parts. Answer Part A and then answer Part B.

   A. They decided how the museum exhibits should be displayed.
   B. They had no role in exhibit creation.
   C. They chose objects that best reflect their tribes’ traditions and beliefs.
   D. They decided exactly how to explain the meaning and importance of these objects.

Part B: What is the result of the role tribal representatives played in exhibit creation?
The following question has two parts. Answer Part A and then answer Part B.

3. **Part A:** What does the word *relics* mean in the following sentence from paragraph 3?

   The objects in the collections at the NMAI are not meant to be viewed as mere artifacts or *relics* gathered by archaeologists and scholars.

   A. ideas  
   B. stories  
   C. myths  
   D. remains

   **Part B:** Underline the words and phrases in the original text that helped you determine the meaning of *relics*.

4. What two ideas from the selection reflect how the museum helped change views about Native American culture?

   A. Tribes sell objects to the museum.
   B. Objects in the museum actually belong to the tribes themselves.
   C. The majority of the museum funding comes from the U.S. government, which at another time in history literally tried to exterminate Native American culture.
   D. The objects are meant to be viewed as artifacts or relics gathered by archaeologists and historians.
5. Using evidence from the text, describe three ways the National Museum of the American Indian (NMAI) is unique compared to other museums.

Coyote Goes to the Land of the Dead

1. Did you ever notice that in the autumn and winter, grass, trees, and other plants die, but they come back to life in the spring? Some Native American tribes told stories to explain why plants died and returned to life, but when people died they did not come back to life. The following is a version of a story told by some Native American tribes in the Pacific Northwest to explain this.

2. It had been a bitterly cold winter, filled with much sickness and death. Coyote's wife died, and he wept bitter tears.

3. Eagle made many attempts to cheer him. “Spring will soon be here with its nurturing warmth and beauty,” he said. Or, “the wildflowers will soon bloom and the wind will carry their sweet scent across the land.” But still Coyote wept. His lonely howls and angry words echoed through the night.
One day the Death Spirit came to Coyote and said, “I will take you on a journey to the place where your wife has gone. Follow me. But listen carefully, Coyote: you must do exactly what I tell you.”

“I promise to do whatever you say,” replied Coyote. “But it is very hard to see you.” It was hard because the Spirit was invisible in daylight.

“I will carry something for you to follow,” said the Spirit. “Give me something your wife treasured.” Coyote hated to give away anything that reminded him of his beloved wife. Reluctantly, he gave the Spirit a special feather she wore when she danced.

They set off on their journey. In the daytime, Coyote could see his wife’s feather. At night, he could not see the feather, but he could see the Death Spirit’s ghostly form in the darkness.

Before long they were in a vast, open plain. The icy wind blew across the open plain and snow fell upon the earth, covering it like a soft blanket. Then the Spirit stopped. “Now,” it said, “do as I do.” The Spirit pointed ahead and said, “What a magnificent group of horses there are.”

Coyote saw nothing, but he pointed and said, “What a magnificent group of horses there are.”

They walked on, until the Spirit said, “There is the splendid longhouse that withstands the snow and wind.”

Coyote saw nothing, but he said, “There is the splendid longhouse that withstands the snow and wind.”

The Spirit then bent down as if to lift a skin-covered door and crawl into a longhouse. Coyote did exactly the same.

“Take a seat there, next to your dear wife,” the Spirit ordered. Coyote sat, though he saw nothing around him but wide open plain covered with snow.
“Now, your wife will serve us something warm and delicious,” the Spirit said. Coyote looked around eagerly but could see nothing. He cupped his hands before his chest, as the Spirit did. Then both drank from their hands. Strangely, Coyote felt warmed.

“Now we must wait for nightfall,” said the Spirit. Coyote slept peacefully. When he woke, he heard the familiar sound of drums. When he looked around, he saw many shadowlike figures dancing. He recognized his old friends who had died. Then, as his wife appeared, Coyote's heart skipped a beat. He greeted his wife with much joy, and this time Coyote shed tears of happiness. They all talked and danced until a shimmering golden sun rose on the horizon. Then the spirits disappeared.

By day, Coyote slept fitfully on the open ground in the bitterly cold air. At night, he woke to find himself surrounded by the spirits of his loved ones. Night after night they talked, laughed, and danced.

Then the Death Spirit came to Coyote and said, “It is time for you to go, Coyote.” Coyote began to protest, but the Spirit silenced him. “Your wife may go with you to the Land of the Living, but only if you do exactly as I say. Follow your wife for five days over the tall mountains. On the sixth day, when you have crossed all five tall mountains and seen the flickering fires of home, only then may you touch her. Do not touch her before then. If you do anything foolish, then the spirits of the dead will never again be able to return to the Land of the Living.

The Death Spirit tied the feather that had belonged to Coyote's wife to her hair so Coyote could follow her spirit in the daytime. On the first day they crossed the first tall mountain. On the second day they crossed the second tall mountain. As they went on, Coyote no longer needed to watch the feather, for the farther they went, the more clearly he could see his beloved wife.

On the fifth night, they camped on the fifth mountain. Coyote sat and watched the warm glow of the fire on his wife's face and hair. Then—who can say why Coyote did this—he jumped across the fire and gently touched his wife's face. As he touched her, she vanished. He cried out as her feather dropped to the ground.
When the Death Spirit learned of Coyote’s folly, he became deeply angry. The Death Spirit appeared before Coyote and said sternly, “Because of you, humans cannot return from death. No spirit will ever again join the Land of the Living.”

Coyote ran howling back over the five mountains until he came again to the wide open plains. Although he saw nothing but swirling dust and snow, he stopped and said, “What a magnificent group of horses there are.” Then he went on and said, “There is the splendid longhouse that withstands the snow and wind.” Then he bent as though to lift a skin-covered door and crawled in on his knees. Then he cupped his hands and drank from them but felt nothing. He waited through the night to hear drums and see spirits dancing. But he heard only the howling of the wind, and he saw only the endless darkness.

The next day, he began the long walk home.

Questions

6. Which of the following describes the spirit of Coyote’s wife and of people who had died? Circle all that apply.
   A. They were shadowlike figures that could best be seen only at night.
   B. They could dance and talk.
   C. They would always wear feathers when they danced.
   D. They were frightened of the living people and would never come near or talk to them.

End-of-Year Assessment—Reading Comprehension

You will read three selections. After reading the first selection, you will answer several questions based on it. Then, you will read the second selection and answer several questions based on it. Finally, you will read the third selection and answer several questions based on it. Some of the questions have two parts. You should answer Part A of the question before you answer Part B.

Passage 1: How the Turkey Buzzard Got His Suit

1. It was a long, long time ago, when the earth was very young. Trees and flowers were growing everywhere, but there were no birds. One morning the Great Spirit drew back the blanket from the door of his wigwam in the sky. He looked upon the earth and smiled, for he saw that his work was good.

2. “Today,” thought he, “I will make big birds to fly in and out among the beautiful trees and flowers of the earth, and they shall sing as they fly.”

3. Then the Great Spirit spoke, and the treetops were full of birds—but they had no feathers.

4. All day he watched them fly and listened to their songs. But their bodies and long legs did not please him, and before the sun had set he had made feathered suits, of every size and color, to cover them.

5. That night, as the birds hid their heads under their wings, the Great Spirit spoke to them. He told them about the feathered suits he had made for them, and where these suits could be found.

6. A council was called the next day by the birds. They chose Gah gah go wah, the Turkey Buzzard, to get the suits. He could fly over a long trail and not be tired.

7. The birds told him that if he would go, he could have the first choice of the suits of feathers, but he must not try on any suit more than once.

8. Turkey Buzzard promised not to try on any suit more than once and set out toward
the setting sun. Twice the sun set, and three times it rose, before he found the feathered suits. There were many of them, and they were very beautiful. He could not make up his mind about which one he would like best to wear.

Then he remembered that he could try on each suit of feathers once. So he began to put them on.

The feathers of the first suit were too long and trailed on the ground as he walked. He could not fly well in them either. Turkey Buzzard laid that suit aside.

The next suit shone like gold, and the feathers were a beautiful yellow. Turkey Buzzard put it on and strutted up and down the forest.

“Oh, how handsome I am!” he said. “But I must not keep this, for if I did, I should shine like the face of the Great Spirit that all the other birds would see me.”

And he slipped off the suit of yellow feathers as quickly as possible.

A third suit was of pure white feathers. Turkey Buzzard thought it looked very beautiful and it was a perfect fit.

“But it will get dirty too soon,” he said. “I will not choose this.”

And this, too, was laid aside.

There were not enough feathers in the fourth suit so Turkey Buzzard shivered with cold. It was not warm enough, and he would not have it.

There were too many feathers, and too many pieces, in the fifth suit. It took too much time to put it on, and Turkey Buzzard did not want that.

So he went from one suit to another, trying it on and taking it off. Always he had some new fault to find. Something was wrong with each one, nothing quite pleased him, and no suit was just right.

At last there was but one suit left, and it was not pretty. It was a plain, dull color and
very short of feathers at the neck and head. Turkey Buzzard put it on. He did not like it, and it did not fit him well as it was cut too low in the neck. Turkey Buzzard thought it was the homeliest suit of all. But it was the last suit, so he kept it on.

21 Then *Gah gah go wah*, the Turkey Buzzard, gathered up the suits and flew back to the bird lodge still wearing the plain, dull-colored suit.

22 The birds again called a council. Each was told to select a suit from those that *Gah gah go wah* had brought, and put it on, which they did.

23 Then the birds in their beautiful feathered suits began to walk and fly about the Turkey Buzzard, and to make fun of his plain, dull dress.

24 But *Gah gah go wah* held his head high and walked proudly about among the birds. He looked with scorn on their beautiful suits. After a time he spoke.

25 He said, “*Gah gah go wah*, the Turkey Buzzard, does not want your suits. He had the pick of them all, and he likes his own suit best.”
Questions

1. Why did the Great Spirit make feathered suits for the birds?
   A. He wanted to use the feathers he had for something.
   B. He couldn’t make up his mind about which birds he liked best.
   C. He didn’t like the way the birds’ bodies and long legs looked.
   D. He wanted the birds to be warm.

2. Why did Turkey Buzzard try on every suit?
   A. He couldn’t make up his mind about which would be the best suit to wear.
   B. He wanted to touch all the feathers.
   C. He was told he could try on each suit as many times as he wanted.
   D. He had to fly a long way to get to the suits.

3. A simile compares two things, usually using like or as. What does the following simile from Paragraph 11 mean?

   The next suit shone like gold and the feathers were a beautiful yellow.

   A. The suit was dull in color and less attractive than the other suits.
   B. The suit had many colors that made it attractive to look at.
   C. The feathers were made of gold and they shone in the sunlight.
   D. The bright yellow feathers made the suit vibrant and colorful, as if it were made of gold.
4. What was wrong with each of the following suits Turkey Buzzard tried on?

The following question has two parts. Answer Part A and then answer Part B.

5. **Part A:** What is the meaning of the word *homeliest* in the following sentence from paragraph 20?

   Turkey Buzzard thought it was the homeliest suit of all.

   A. colorful
   B. itchy
   C. appealing
   D. unattractive

**Part B:** Underline the words and phrases in the text that helped you determine the meaning of *homeliest*. 
6. Why did Turkey Buzzard hold his head high and walk proudly in his chosen suit among the other birds?
Passage 2: Titian

1. We have seen how most of the great painters loved to paint scenes which they had known when they were boys. They clearly and vividly remembered these scenes all their lives. So when we come to the great Venetian painter Titian, we look with interest to see where he was born. This will help us know what pictures of nature he had in his mind when he was still a boy.

2. At the foot of the Alps lies the little town of Cadore on the Pieve River. This is where Titian was born. On every side rise great masses of rugged mountains towering up to the sky, with jagged peaks and curious fantastic shapes. Clouds float around their summits. The mist will often wrap them in gloom and give them a strange and awesome look. At the foot of the craggy pass the mountain-torrent of the Pieve roars and tumbles on its way. Far-reaching forests of trees, with weather-beaten, gnarled, old trunks, stand firm against the mountain storms. Beneath their wide-spreading boughs there is a gloominess almost of twilight, showing glimpses here and there of deep purple distances beyond.

3. No wonder Titian loved to paint mountains and was the first to paint a purely landscape picture. He grew up in those strange solemn mountains and the wild country around them, in the deep gloom of the woods and the purple of the distance beyond.

4. The boy’s father, Gregorio Vecelli, was one of the nobles of Cadore, but the family was not rich. When Titian was 10 years old he was sent to an uncle in Venice to be taught some trade. He had always been fond of painting. It is said that when he was a very little boy he was found trying to paint a picture with the juices of flowers. His uncle, seeing that the boy had some talent, placed him in the studio of Giovanni Bellini.

5. Titian learned much from Bellini. But it was not until he first saw the artist Giorgione’s work that he dreamed of what was possible to do with color. From that point forward he began to paint with a marvelous richness of color. This is what made his name famous all over the world.

6. At first, young Titian worked with Giorgione. Together they began to create frescoes on the walls of the Exchange above the Rialto Bridge in Venice. But over time
Giorgione grew jealous. Titian's work was praised too highly and was even thought to be the better of the two. So they parted company.

7 It became clear that Titian was another great painter who was likely to bring fame and honor to the city of Venice. He was invited to finish the frescoes in the Grand Council chamber, which Bellini had begun. He was also invited to paint the portraits of the Doges, Venice's rulers.

8 These portraits which Titian painted were greatly admired. All the great princes and nobles desired to have themselves painted by the Venetian artist. The Emperor Charles V himself stopped at Bologna and sent someone to Venice to get Titian. The Emperor was so delighted with Titian's work that he made the painter a knight with a pension, or retirement payment, of two hundred crowns.

9 Fame and wealth awaited Titian wherever he went. Before long he was invited to Rome to paint a portrait of the Pope. There he met Michelangelo, who looked with much interest at his work. Michelangelo praised Titian's work highly, for the use of color was like nothing he had ever seen before.

10 "It is most beautiful," Michelangelo said afterwards to a friend. "But it is a pity that in Venice they do not teach men how to draw as well as how to use color. If this Titian drew as well as he painted, it would be impossible to surpass him."

11 But ordinary eyes can find little fault with Titian's drawing, and his portraits are thought to be among the most wonderful ever painted. Besides painting portraits, Titian painted many other kinds of paintings, and these too are considered to be masterpieces.

12 Titian lived to be a very old man, almost a hundred years old. Even as an old man, he was always seen with the brush in his hand, painting some new picture. When he passed away, he left behind many beautiful paintings that adorned the walls of his beloved Venice. In fact, he made the whole world richer and more beautiful.
Questions

7. What is the painter Titian known for?
   A. richness of color in landscapes and portraits
   B. religious art
   C. working with the artist Giorgione
   D. being the son of a noble

The following question has two parts. Answer Part A and then answer Part B.

8. **Part A**: What work made it clear that Titian would bring fame and honor to Venice?
   A. the first purely landscape picture he created
   B. pictures he painted using juices of flowers
   C. the portrait of Emperor Charles V
   D. the walls of the Exchange above the Rialto Bridge

   **Part B**: Why did this work make it clear Titian was a talented painter?

9. Why is it not surprising that Titian was the first artist to paint a purely landscape picture?
   A. He grew up in Venice, among the canals and busy trading atmosphere.
   B. He grew up in the mountains, among beautiful, natural scenes.
   C. He grew up in Rome, around religious art commissioned by the pope.
   D. He grew up in a busy city, around lots of people, merchants, and art.
10. What does the following sentence from paragraph 9 mean?

Fame and wealth awaited Titian wherever he went.

A. It was hard for Titian to find work no matter where he went.
B. Titian was so talented that wherever he went he became famous and wealthy.
C. Titian became famous and wealthy only when he worked with Giorgione.
D. Titian became famous and wealthy only because he worked with Michelangelo.
Passage 3: Improvements in Transportation

Getting Around

1. In the 1700s, America’s population grew and spread. One thing became clear: The United States would need to improve its transportation system. Roads were dirt paths really, dusty in summer, muddy in winter, with tree stumps sticking up here and there. These would not do for a growing nation.

2. By 1800, improvements had, in fact, been made on many of the roads that connected the growing cities and towns of the East. They had been widened and were able to handle wagon traffic as well as horses. It was now possible to travel between the main towns by stagecoach.

3. The stagecoach got its name from the fact that it made its journey “in stages”: every 15 or 20 miles, the driver of the coach stopped at a station to change the team of horses for the next stage of the journey.

4. Although stagecoach travel was an improvement over travel on horseback, it was still hardly a comfortable experience. You began your trip at 2:00 or 3:00 in the morning. Sitting on hard, wooden seats in a coach without springs, you felt every bump and hole in the unpaved roads. Male passengers learned not to dress in fancy clothes, because when the wheels of the coach got stuck in a mud hole the men were expected to help lift the coach out.

5. When the sun went down and your stagecoach stopped at an inn, you found things hadn’t changed much since the early 1700s. You still got a bad meal and a terrible night’s sleep. Often travelers slept four in a bed, with males in one bedroom and females in another.
**Turnpikes**

6 Another improvement was the development of roads called turnpikes. Just before 1800, a number of people figured that if they could build good roads, they could charge people for using them. Every ten miles or so, the road's owners would collect a toll, or fee. They did this by placing a pike, or pole, across the road, blocking passage until the traveler paid the toll. That is how the turnpike got its name. When the toll was paid, the pike would be turned, allowing the traveler to pass.

7 Some of these turnpikes were actually paved with stone or gravel. Most, though, were just improved versions of the old dirt road—a little smoother, a little wider, with the tree stumps in them a little lower. But the newer roads were just as dusty and muddy, depending on the season, as the older roads. And most of them ran between the cities of the East, where there were lots of users to pay the tolls. No turnpike ran very far west.

8 None of these improvements, then, answered the growing needs of people who were moving west. There were few roads wide enough for wagons. Pioneers, therefore, still traveled mainly on foot, leading a horse or mule that carried their supplies.

**Steamboats**

9 Improved roads were a big help, but they were still a very slow and expensive way for westerners to ship their farm products to the markets of the world. Rivers provided a better way to do that. Most of the streams west of the Appalachian Mountains emptied into the Ohio River. The Ohio in turn emptied into the great Mississippi River. That is why so many settlers chose to farm the land along these waterways. They could load their goods on flatboats and float them downstream all the way to the port of New Orleans. From there the goods could be sent by ship anywhere in the world.

10 But flatboats could not return upstream against the current without great human effort. Most farmers therefore, after selling their crops in New Orleans, would break up their boats and sell them for lumber. They then returned north by horseback or on foot.

11 Was there some way that would allow river travel to go upstream as well? An American inventor named Robert Fulton believed he knew how. He built a boat and
placed two large paddle wheels on its sides. He then installed a steam engine that would turn the paddle wheels, which would work like oars and push the boat through the water.

Fulton named his boat the Clermont. Others who saw this odd-looking boat laughed and called it a different name: Fulton's Folly. But Robert Fulton had the last laugh. In August 1807, the Clermont steamed up the Hudson River, against the current, from New York City to Albany—150 miles in only 32 hours. Fulton's steamboat made the trip in far less time than a horse-drawn wagon could, and it carried a much larger cargo. It did not take long for steamboats to make their appearance on the Ohio and Mississippi Rivers, carrying passengers and goods down and especially up these water highways.
Questions

11. What improvements in transportation are presented in this passage? Circle all that apply.
   A. roads widened to handle wagons and horses
   B. stagecoach travel
   C. turnpikes
   D. flatboats
   E. steamboats

12. Why did road owners collect a toll?

   __________________________________________________________

13. Why were improvements in transportation needed in the United States in the 1700s and 1800s?
   A. The population in the United States was declining, as was the need for transportation methods.
   B. The population in the United States was growing and spreading, and transportation was needed to accommodate those changes.
   C. People didn't need to use roads and waterways for travel or for shipping goods.
   D. Turnpike developers stopped collecting tolls from travelers using the roads.
The following question has two parts. Answer Part A and then answer Part B.

14. **Part A:** What is the meaning of the word *folly* in the following sentence from paragraph 12?

   Others who saw this odd-looking boat laughed and called it a different name: *Fulton’s Folly*.

   A. important improvement  
   B. new approach  
   C. foolish idea  
   D. slow method  

   **Part B:** What words and phrases in the text helped you determine the meaning of *folly*?

   __________________________________________________________
   __________________________________________________________
   __________________________________________________________
   __________________________________________________________

15. The idiom *had the last laugh* means to succeed when others thought you wouldn’t. What does it mean in paragraph 12 when it says Fulton had the last laugh?
16. Compare and contrast the stagecoach, turnpikes, and the steamboat as improvements in transportation. Which improvement best addressed transportation issues and why?

Birds

Birds have several characteristics that enable them to fly, but being warm-blooded is essential to flight. They have a very high metabolism as only warm-blooded animals do. Metabolism is the process which produces energy in most animals' bodies. The high metabolism of birds is a steady flow of energy that helps them maintain the high levels of activity required by flight. The higher the activity level of an animal, the higher its metabolism is likely to be. What this means when it comes to eating is that they need lots of food to maintain that energy.

Have you ever heard the saying *eats like a bird* for someone who eats very small amounts of food at one time? An important thing to remember about this expression is that it does not mean birds do not eat very much. In fact, birds need to eat two times their body weight in food every day. This is because they have such a high metabolism and burn lots more energy than most animals. There are lots of small meals a day for birds. So, someone who “eats like a bird” is usually someone who “picks” at his or her food and only eats small bits at a time.

Cold-blooded animals depend on their surroundings to regulate internal body temperatures. But warm-blooded animals are able to produce heat for energy within their own bodies. They can travel farther and live in more extreme conditions than cold-blooded animals. The only warm-blooded animals that are able to go without food for long periods of time are hibernating animals. That’s because their metabolism slows way down when they are hibernating, and they require less energy to stay alive.

Wings are also essential to flight. The shape of a bird's wings determines how far and high a bird can fly, in addition to its lightweight bones.
What else helps all birds fly? Feathers are a great help, serving as lightweight coverings for their wings. They mesh together as their wings flap downward, parting again to let air through as their wings sweep upward again. Feathers also act as insulation. Insulation is an extra layer that protects birds’ skin from the sun and traps in heat. The trapped heat provides energy and warmth in the winter months. The point of the feather where it is attached to a bird's body is called the quill. All birds have feathers. No other animals do, so if you spot a feathered friend, you may assume that it’s a bird. Because their precious feathers take quite a beating, birds take good care of them. Birds often preen their feathers with their beaks to keep them clean, waterproof, and in the right position.

Parfleche Image and Description

This image shows a parfleche, or a case used to carry things. This parfleche is made of buffalo hide, with a leather string used to fasten it. Parfleches were made and designed by women. They scraped the hide with a rock or piece of bone to make it clean. Women made colored paints from things in nature such as flowers, berries, bark, or clay. They used these colors to paint designs on the cases. The Cheyenne often had two matching parfleches that hung from each side of their horses as they rode. They carried objects such as dried buffalo or deer meat, medicinal plants, and important objects for ceremonies. Tribes often traded these bags as a ceremonial gesture of friendship. You might see a Sioux warrior carrying a parfleche made by a Cheyenne woman.
